

WAX RECOMMENDATION **TOKO**[®]

Craftsbury National Masters 10K Skate

Craftsbury, VT

Thursday, January 28

2:30 P.M.

10.5K Skate

Wave start by age bracket

1 loop

Forecast/Conditions: Wednesday night low 15, 50 percent chance of snow. Thursday high in the high 20s, 60 percent chance of snow. The track will be PistenBully groomed, mostly in the woods, and will be old snow, dirty, firm and fast. Snow temperature at the start should be in the mid 20s.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Moly, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: Stiff skis and universal grind covered by one pass with the Red TOKO Structurite tool (old medium offset wheel) before JetStream application will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
