

WAX RECOMMENDATION **TOKO**[®]

Grafton Pond Ski Orienteering Championships

Grafton Ponds Outdoor Center, Grafton, VT

Tuesday, February 16

10 A.M.

Mid distance, Skate

Mass start

Forecast/Conditions: Monday night low 13. Tuesday high 33, mostly cloudy. Snow temperature in the morning in the mid-20s. Trail conditions are packed powder over hard granular base. Staff at Grafton has been farming snow extensively and trails are in excellent condition.

Glidewax: Iron on LF Moly, scrape and brush. Then iron on HF Red, scrape and brush out well. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush, and buff with a thermopad.

Structure: A universal grind covered by one pass with the Red TOKO Structurite tool (old medium offset wheel) before JetStream application will best suit these conditions.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
