

WAX RECOMMENDATION

NYSPHSAA Classic Relay Race

Bristol Mountain Summit Nordic Center, Canandaigua, NY

Wednesday, February 24

10 A.M.

3K Classic Relay

Forecast/Conditions: Overnight low 17, temperature at start 22. Expect packed powder, cloudy skies, 60 percent chance of snow during race.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Red, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Apply Carbon BaseWax Green to kick area and iron in. Let cool and then apply 2-3 layers of Carbon GripWax Blue to your kick area being sure to cork in between layers. If this is not working apply a layer of Carbon Viola over the Blue and cork in. Then cover the Viola with another layer of Blue over the top.

Structure: A fine linear structure covered by one pass with the fine-linear wheel of a TOKO structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
