

WAX RECOMMENDATION

Stowe Derby

Mt. Mansfield, Stowe, VT

Sunday, February 28

16K Skate/Classic

10 A.M. Skate; Noon Classic

Wave Start, 5 People/30sec.

Point-to-Point

Forecast/Conditions: Saturday has a 60 percent chance of snow, low in low 20s. Sunday, a 40 percent chance of snow, high in the low 30s. The snow temperature at skate race time will be low 20s on the mountain and high 20s on the flats into town. It will warm a little for the classic race, into the low 30s on the lower rolling parts of the course. The first 6K are downhill, the last 4K are flat.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Red, scrape and brush. Finish by rotocorking JetStream Red/ Yellow mix, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply 4 layers of Carbon GripWax Yellow, corking between layers. Cool and cover with 2 layers of Carbon GripWax Red

Structure: A universal grind covered by one pass with the Red TOKO Structurite tool (old medium offset wheel) before JetStream application will best suit these conditions.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
