

WAX RECOMMENDATION

Methow Rendezvous Redemption 30K

Cub Creek Trailhead, Winthrop, WA

Saturday, February 27

9 A.M.

30K Freestyle

Mass Start

Single loop

Forecast/Conditions: Minor snowfall amounts occurring just below freezing in days leading up to event. Overnight low in the mid to high 20s with a 70 percent chance of snow Friday night of 1-3". Slight chance of snow during event.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Yellow, scrape and brush. Finish by rotocorking JetStream Yellow, brushing with a dedicated nylon polishing brush and finishing with a thermopad.

Gripwax: This would be a difficult race to use classic technique due to the 2 major climbs on narrower trails that will probably have the tracks destroyed .

Structure: Warm grinds such as Nordic Ultratunes M1D should work well. Colder grinds such as the MVX grind should be covered with a single pass with the Yellow TOKO Structurite tool (old coarse offset) prior to rotocorking Jetstream.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
