

WAX RECOMMENDATION

New Year's Blast Biathlon Race

Mazama, WA

Monday, December 28

11:15 A.M.

3K/12.5K Freestyle

Interval Start Pursuit Format

Multiple laps

Forecast/Conditions: Overnight low of 15, snow temperature at start expected to be close to 20 degrees. Thin, old, transformed snow with some dirt mixed in will be found on a day expected to include fog and cloud cover.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Blue, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad. Waxing on the cold side will help in ski base preservation.

Gripwax: NA

Structure: A fine linear grind such as Nordic Ultratune's S2 or MVX should work well. A fine linear structure covered by one pass with the Blue TOKO Structurite tool (old fine linear wheel) before JetStream application will best suit these conditions.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
