

# WAX RECOMMENDATION

## Ski Rodeo

Community Center, Mazama, WA

Saturday, December 31

10:30 A.M.

1K/2.5K/5K/10K Skate

Wave Starts

Single loop

<http://www.mvsta.com>

**Forecast/Conditions:** Overnight low of 23 with new snow falling in days leading up to and possibly during the event. Expect soft snow conditions and temperatures in the mid-20s with high humidity.

**Glidewax:** Apply LF Moly, scrape and brush, then apply HF Red, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

**Gripwax:** NA

**Structure:** A universal grind covered by one pass with the Red Structurite tool (before JetStream application) will best suit these expected conditions. Nordic Ultratune's D5 or MVX grinds should run well.

**Racing - Service**

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in. To see optimal application procedures for both Glidewax and Gripwax, go to [www.TokoVideos.com](http://www.TokoVideos.com).
