

WAX RECOMMENDATION

Spam Cup #3

Rendezvous Trails, West Yellowstone, MT

Saturday, February 6

11 A.M.

1K/2K/8K/14K Classic

Forecast/Conditions: Friday night, a chance of snow showers, mostly cloudy with low around 15F. Saturday, a chance of snow showers, mostly cloudy with high near 29. Expect race time temperature in the low to mid 20s. Snow in West Yellowstone is typically dry and abrasive this time of year so it's usually best to lean toward a colder wax.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Red/HF Blue mixed 1:1, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply 5 layers of Carbon GripWax Blue, corking smooth between layers. Check temperature prior to race start and adjust as needed.

Structure: A fine linear structure covered by one pass with the fine-linear wheel of a TOKO structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
