

# WAX RECOMMENDATION

## Spud Chase

Teton Springs Golf Club, Victor, ID

Saturday, January 30

11 A.M.

10K/20K Skate

2K Kids' race at 10 A.M.

Forecast/Conditions: Cloudy skies forecast with overnight low in the low teens. Race day high in the low 30s. Course conditions should be softer packed powder.

Glidewax: Apply LF Moly, scrape and brush, then apply LF Red scrape and brush. For those inclined for even speedier skis, apply HF Red, scrape and brush, then finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: Fine grind with minimal structure. A fine linear structure covered by one pass with the Blue TOKO Structurite tool (old fine-linear wheel) before JetStream application will best suit these conditions.

Racing - Service

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
