

WAX RECOMMENDATION

Bozeman SuperTour -- Sunday

Bohart Ranch, Bozeman, MT

Sunday, Dec. 6

10 A.M.

10K Classic Women; 15K Classic Men

Mass Start

Forecast/Conditions: Saturday night low -9F; Sunday high -1F, new snow expected overnight and throughout the day on Sunday. Start time temperature around -5F with a soft track condition. Anticipate dry, wind-blown and abrasive ("east slope") snow.

Glidewax: Apply LF Blue, scrape and brush well, then apply HF Blue, sprinkle on Nordlite Powder X-cold, iron in together, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Check at the Toko tent for updated grip wax recommendation. Likely grip wax recommendation will be Carbon GripWax Mint, 5-6 layers, smooth between layers. It may be necessary to use a "cushion" layer (softer) below the final kick wax layers. Testing will be done on site prior to the event and posted.

Structure: A fine linear structure will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
