

WAX RECOMMENDATION

Bozeman Creek Climb - Updated!

Sourdough Trailhead/Bozeman Creek, Bozeman, MT

Saturday, December 24

9 A.M.

8K/5K Classic

Mass Start

Point to Point Climb

Forecast/Conditions: Fresh snow expected mid-week with high temperatures staying in the upper 20s to low 30s. Friday overnight low in the mid-teens, temperature at start expected in the mid-20s with mostly sunny skies.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Blue/HF Red mixed 1:1, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in a thin layer of Nordic Base Wax Green, cork smooth, let cool. For kick wax, see Toko Wax Easel at the start area for recommendation.

Structure: A fine to medium structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions. A Structurite tool will be available at the start in case conditions are warmer than expected.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in. To see optimal application procedures for both Glidewax and Gripwax, go to www.TokoVideos.com.
