

WAX RECOMMENDATION

TOKO[®]

Susan Walker Memorial

Teton Pines, Wilson, WY

Saturday, January 21

11 A.M.

10K/5K for adults, 2K for kids, Skate

Mass Start

5K lap

Teton Pines Nordic Center (307) 733-1005

Forecast/Conditions: Overnight low 23, temperature at start 32. A 100 percent chance of snow overnight and at race time. Expect wind blown, soft powder that may be transforming to packed wet snow.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Red, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad. Consider a prerace application of Red Helix Spray for superior glide.

Structure: A medium, cross-hatched structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in. To see optimal application procedures for both Glidewax and Gripwax, go to www.TokoVideos.com.
